#### **Pavilions 1, 2, 3, 4**

The available fixing system on Level 1 consists of a railing system distributed following the predefined aisles for the standard layout of stands. These rails have maximum bearing loads, both linear and point, and different types of compatible fixing mechanisms. The maximum loads are 400kg for linear loads and 600kg for point loads.

#### **Requirements**

If your company shall require setting up suspended structure, Feria Valencia will study the possibility of offering this service. Due to the ceiling height, only 5.20 maximum, Feria Valencia has to study each case separately. If you shall require this service please send the following documents: All floor and height plans must be approved by Feria Valencia in order to comply with the assembly and dismantling regulations. When assembling ceiling fixing systems with truss, a height plan with truss must be presented as well. All assembling company must pay a fee for ceiling fixture points as well as a deposit which will be reimbursed once the fixture point has been given back to the assembly office. The fixture points works will be carried out by any assembly company chosen by the exhibitor these will be rated separately upon request. All application forms must be sent per fax or mail and then per regular mail no later than the 15th of July 2008, keeping a copy for you.
